How To Read This Report

▶ You can either go through the report in a sequential manner or directly jump to an industry of your choice from the table of contents.

▶ Q1, 2020 refers to the months of January, February, and March, and Q2, 2020 refers to the months of April, May, and June.

▶ 'Downloads' refers to mobile app downloads from both Google's Play Store and Apple's App Store.

▶ DAU or Daily Active Users refers to the total number of people who open and engage with a mobile app in a given day.

▶ Average Session Duration is the total duration of all sessions (in seconds) / number of sessions.

▶ All data shown in this report is relative to Q1, 2020 - percentage movements. All data charts in this report show the relative movement of a metric in Q2, 2020 relative to Q1, 2020.

▶ Most graphical data representations in the report are collected through all the apps in the associated Play Store/App Store category.

▶ Few industries in the report display graphical movement in Q2 vs Q1. This is made by taking a representative set of apps in the associated Play Store/App Store category.

"In God we trust, all others must bring data."
- W. E. Deming

A lot has happened in 2020. We started the year in a festive mood. Travel & hospitality were cashing in on Q1 earnings and then the Covid-19 pandemic hit us.

Similar to most other global recessions, the Covid-19 linked recession hit businesses around the world. As countries entered into various levels of lockdown and shelter-in-place, industries such as **Travel, Hospitality and Mobility were hit pretty hard.**

While the digitally savvy industries such as **Media & Entertainment, Social Media, E-commerce, Food Delivery and Gaming continue to grow in strength**, it is the increase in digital adoption of products and services that were predominantly considered offline that is a pleasant surprise.

Gyms, grocery chains, pharmacies, real estate and even **banks have almost overnight grown their digital footprint.** These offline-turned-online businesses have not only onboarded millions of users in the past 6 months but also continue to **sustain customer interest by delivering value and engaging users** effectively.

While management consultants are trying to analyze and make sense of the widening business impact of Covid-19, MoEngage and Apptopia bring you the **actual data from Q2, 2020** - data that reflects consumer confidence trends in different industries. Data that highlights shifts and **helps you prepare for the future.**
We have identified data patterns of 1.5 billion mobile app users spread across **5 different geographical regions.** In this report, we have covered **9 different industry** verticals and **6 sub-verticals.**

In a snapshot, **all industries** except Travel, Hospitality and Mobility are **neutral or see a positive growth** in downloads and daily active users.

Explosion	Growth	Slowdown
High downloads and daily active users	Flat to high growth in downloads and daily active users	Drop in downloads and daily active users
Edtech	E-commerce	Travel & Hospitality
Health, Fitness & Online Pharmacy	Social Media	Mobility
Banking & Fintech	Food Delivery	
	Media & Entertainment
